

**Mobile Lifting Work Platform UP 5**

Mobile Lifting Work Platform UP5 is a mobile lifting platform, designed for applications in industrial vehicle body repair plants, preparation areas, paint booths and finishing areas, for large and medium size vehicles and components.

**Description**

UP5 is a mobile lifting platform, designed for applications in industrial vehicle body repair plants, preparation areas, paint booths and finishing areas, for large and medium size vehicles and components.

Specifically designed with reduced overall dimension and with 3-axis moving cabin **UP5** takes minimum room inside the working area and let the operator reach all the parts of the vehicle to be worked. The air-gauge plug on the cabin can feed all types of manual painting devices and different kind of air operated tools.

**ATEX Cat. II labelling.**

## Booths layout customizations

Giuliano Engineering Department supports all customers from the choice of the correct UP5 version, through the best optimized booth layout, up to a professional training for customers's operative Staff.
