Description

Tyre-changer suitable for truck and heavy duty tyres with 12" - 46"/58"⁽¹⁾ rim (max. wheel diameter 2500 mm./98", max. wheel width 1500 mm./ 58"), equipped with **two-speed hydraulic clamping chuck**, tool hold arm and chuck hold arm carriages both with automatic motion and automatic tool rotation for a full automation of functions, and mobile control unit for **safe and convenient** operation. Operating arm and clamping chuck holding arm, **moving on the same axis and working differently than in the other models**, always keep same angle for best performance on all tyres. This solution also allows working at any height from ground (even a few centimeters) making tyre mounting / demounting operation **safer**.

Suggested for truck, bus and agriculture tyres, professional truck tyre service and high volume shops.

Functions

- Hydraulic movement of clamping chuck holding arm (up-down and left-right);
- Hydraulic travel movement of operating arm carriage (left-right);
- Operating arm and clamping chuck arm tilting in same direction, working always with 90° angle;
- Operating arm and clamping chuck arm travelling left-right simultaneously;
- Double tool (disk + finger) hydraulic automatic rotation;
- Wheel clamping by fully hydraulic operated jaws;
- Operating arm hydraulic automatic tilting and travelling on carriage;
- All motions controlled by console and pedal box;
- Emergency safety button on control console, for stopping all functions;
- Suitable for control console installation on pivoting arm (optional);
- Rim center hole clamping range \varnothing 80 - 1200 mm;
- Clamping chuck minimum height from ground 365 mm (center);
- Suitable for remote control installation (optional).

⁽¹⁾ For the rims from 47" to 58" it is necessary to use the **optional** set of 4 jaw extensions for clamping wheels from 47" to 58".
