

3D Two-Camera Wheel Aligner with Automatic Camera Beam Tracking

3D two-camera wheel aligner for passenger cars and light commercial vehicles, featuring an automatic camera beam tracking system synchronized with the lift movement for fast, accurate wheel alignment without manual adjustment.

Description

3D Two-Camera Wheel Aligner for passenger cars and light commercial vehicles, featuring an **automatic tracking camera beam** synchronized with lift movement for fast, accurate and effortless wheel alignment.

FEATURES

- 3D measuring technology with two high-resolution cameras and compact targets.
- Motorised camera beam with automatic target tracking, synchronized with lift movement (XLINER A200 TOP only).
- Wheel alignment measurements and adjustments can be performed with the vehicle at ground level or at any lifting height.
- Real-time measurement processing for faster and more accurate adjustments.
- Two run-out compensation procedures: **Standard** and **Quick**.
- Dedicated procedure for front axle measurements and adjustments only (XLINER A200 TOP only).
- Guided steering procedure for caster, kingpin inclination and toe-out on turns measurements.
- Maximum steering angle measurement.
- Measurement of wheelbase, track width, axle offset, cross diagonals and rolling radius (wheel diameter difference).
- Front axle steering axis inclination measurement.
- Rear axle thrust angle measurement.
- Two graphic display modes: **Easy** and **Dynamic** (XLINER A200 TOP only).
- Zoom function for improved parameter visibility during adjustments.
- Three-colour tolerance display for immediate parameter evaluation.
- Three operating modes: **Standard**, **Fast** and **User-customizable**.
- Customizable print reports including operator details, company logo and print colours.
- Multiple report layouts selectable from the customization menu.
- Job archive with quick search function.
- Lightweight high-resolution targets:
 - Front: **15.5 x 15.5 cm**
 - Rear: **22 x 22 cm**
- Designed for high-volume workshops, delivering outstanding accuracy, repeatability and increased productivity.
- Vehicle database selectable by region, including passenger cars and light commercial vehicles.
- Customizable vehicle search within the database.
- Manual entry of custom vehicle specifications.
- Multilingual software.

Workshop Connectivity

XLINER A200 TOP allows workshop PCs to store, manage and share wheel alignment data efficiently, simplifying job management and improving workshop productivity.

STANDARD ACCESSORIES

- 4 measuring targets
- 4 self-centering wheel clamps with reversible pins
- PC, monitor, keyboard and mouse
- Brake pedal lock
- Steering wheel lock
- Wheel chocks
- Turntables
- Wheel alignment software with vehicle database

Giuliano Industrial S.p.A.

Standard Features

Camber (Front/Rear)	± 10°00
Caster	± 20°00
Half Toe (Front/Rear)	± 10°00
Total toe	± 20°00
Toe out on turns	± 10°00
Power supply	230 V AC, 50 Hz / 110 V AC, 60 Hz
Power consumption	200 W (without printer)
Operating temperature	0° - 45°C (without printer)

4 targets and 4 self-centering clamps with reversible pins

PC, monitor, keyboard and mouse

Brake pedal lock

Turntables

Wheel chocks

Steering wheel lock

Wheel alignment software and Database
